

Dear customer,
thank you for purchasing our product. Please read these brief instructions for successful installation of the floating nightstand. The stand is delivered with base plate (for wall mounting), plugs and screws for **brick or concrete** wall

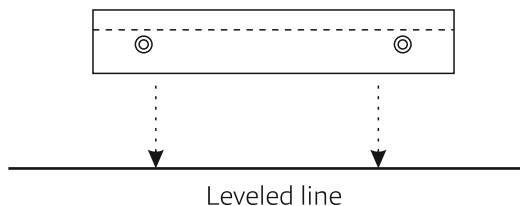

Step 1

Choose desired height of the stand (the top height from the floor) and draw levelled line 10 cm BELOW this measure on the wall - **M**

Step 2

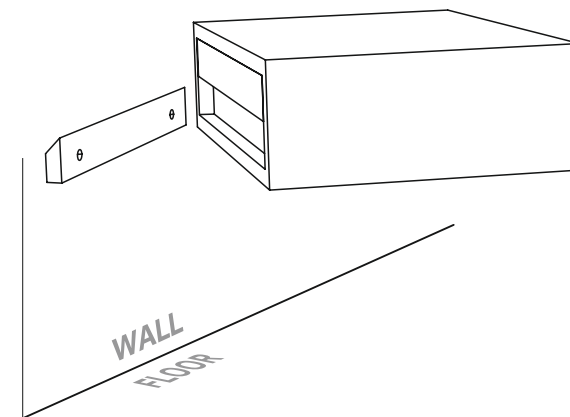

Line up the bottom of the base plate with a drawn line and mark spots for drilling. Drill with 10 mm bore bit. *Hint: drill first with smaller bore.*

Put the plastic plugs into the wall and screw the base plate with two screws supplied with the nightstand.

Step 3

Push the shelf against the wall over the base plate and slide it down. Tap firmly on the upper side with the hand until it sits on it.

CAUTION: Do not attempt to hang the base plate with supplied plugs and screws on plaster board!
